CLAIMS

- 1. An anti-infective medical article prepared by exposing a polymer-containing medical article, for an effective period of time, to a treatment solution comprising between 1 and 8 percent (weight/volume) of minocycline and between 1 and 8 percent (weight/volume) of a chlorhexidine compound.
- 2. The anti-infective medical article of claim 1, where the treatment solution further comprises a bismuth salt at a concentration of between 0.5 and 2.0 percent (weight/volume).

10

5

- 3. The anti-infective medical article of claim 1, where the treatment solution further comprises between 0.2 and 1.0 percent (weight/volume) benzalkonium chloride.
- 4. The anti-infective medical article of claim 2, where the treatment solution further comprises between about 0.25 and 1.0 percent (weight/volume) benzalkonium chloride.
- 5. The anti-infective medical article of claim 2, where the bismuth salt is 20 bismuth nitrate.
 - 6. The anti-infective medical article of claim 4, where the bismuth salt is bismuth nitrate.
- 7. The anti-infective medical article of claim 2, where the bismuth salt is bismuth citrate.
 - 8. The anti-infective medical article of claim 4, where the bismuth salt is bismuth citrate.

- 9. The anti-infective medical article of claim 2, where the bismuth salt is bismuth salicylate.
- 10. The anti-infective medical article of claim 4, where the bismuth salt is5 bismuth salicylate.
 - 11. The anti-infective medical article of claim 1, where the chlorhexidine compound is selected from the group consisting of chlorhexidine free base, chlorhexidine diacetate, chlorhexidine gluconate and mixtures thereof.

- 12. The anti-infective medical article of claim 2, where the chlorhexidine compound is selected from the group consisting of chlorhexidine free base, chlorhexidine diacetate, chlorhexidine gluconate and mixtures thereof.
- 13. The anti-infective medical article of claim 3, where the chlorhexidine compound is selected from the group consisting of chlorhexidine free base, chlorhexidine diacetate, chlorhexidine gluconate and mixtures thereof.
- 14. The anti-infective medical article of claim 4, where the chlorhexidine compound is selected from the group consisting of chlorhexidine free base, chlorhexidine diacetate, chlorhexidine gluconate and mixtures thereof.
 - 15. An anti-infective medical article prepared by exposing a polymer-containing medical article, for an effective period of time, to a treatment solution comprising between 1 and 8 percent (weight/volume)of minocycline, between 1 and 8 percent (weight/volume) of triclosan, and a bismuth salt at a concentration of between 0.5 and 2.0 percent (weight/volume).
- 16. The anti-infective medical article of claim 15, where the treatment solution further comprises between 0.25 and 1.0 percent (weight/volume) benzalkonium chloride.

- 17. The anti-infective medical article of claim 15, where the bismuth salt is bismuth nitrate.
- 5 18. The anti-infective medical article of claim 16, where the bismuth salt is bismuth nitrate.
 - 19. The anti-infective medical article of claim 15, where the bismuth salt is bismuth citrate.
- 20. The anti-infective medical article of claim 16, where the bismuth salt is bismuth citrate.

25

- 21. The anti-infective medical article of claim 15, where the bismuth salt is bismuth salicylate.
 - 22. The anti-infective medical article of claim 16, where the bismuth salt is bismuth salicylate.
- 23. An anti-infective medical article prepared by exposing a polymer-containing medical article, for an effective period of time, to a treatment solution comprising between 1 and 8 percent (weight/volume) of minocycline, between 0.25 and 1.0 percent (weight/volume) of benzalkonium chloride, and between 0.5 and 2.0 percent (weight/volume) of a bismuth salt.

24. The anti-infective medical article of claim 23, where the bismuth salt is selected from the group consisting of bismuth nitrate, bismuth citrate, and bismuth salicylate.

- 25. An intravascular catheter comprising between 100 and 450 micrograms of minocycline per centimeter and between 130 and 520 micrograms of a chlorhexidine compound.
- 5 26. The catheter of claim 25 further comprising between 50 and 300 micrograms per centimeter of a bismuth salt.
 - 27. The catheter of claim 26 where the bismuth salt is selected from the group consisting of bismuth nitrate, bismuth citrate and bismuth salicylate.
 - 28. The catheter of claim 26 further comprising between 25 and 100 micrograms per centimeter of benzalkonium chloride.
- 29. The catheter of claim 25 where the chlorhexidine compound is selected from the group consisting of chlorhexidine free base, chlorhexidine diacetate, chlorhexidine gluconate, and mixtures thereof.
 - 30. The catheter of claim 25 further comprising between 50 and 200 micrograms per centimeter of a zinc salt.
 - 31. The catheter of claim 25 further comprising between 25 and 300 micrograms per centimeter of a silver-containing compound.
- 32. The catheter of claim 31 where the silver-containing compound is silver carbonate.
 - 33. An intravascular catheter comprising between 100 and 450 micrograms of minocycline per centimeter, between 130 and 750 micrograms of triclosan per centimeter, and between 50 and 300 micrograms of a bismuth salt per centimeter.

- 34. The catheter of claim 33 where the bismuth salt is selected from the group consisting of bismuth nitrate, bismuth citrate and bismuth salicylate.
- 35. The catheter of claim 33 further comprising between 25 and 100 micrograms per centimeter of benzalkonium chloride.
 - 36. The catheter of claim 33 further comprising between 50 and 200 micrograms per centimeter of a zinc salt.
- 10 37. The catheter of claim 33 further comprising between 25 and 300 micrograms per centimeter of a silver-containing compound.
 - 38. The catheter of claim 33 where the silver-containing compound is silver carbonate.
 - 39. An anti-infective medical article prepared by exposing a polymer-containing medical article for an effective period of time to a treatment solution comprising between 1 and 8 percent (weight/volume) of minocycline and between 0.5 and 2.0 percent (weight/volume) of a bismuth salt.
